

Oracle 9i Administration

Description:

Our Oracle 9i Administration test measures your knowledge of administering Oracle 9i databases. Designed for experienced Oracle Database Administrators, Data Modelers and Data Architects, this test includes the following topics: Administration, Managing Objects, Networking, Tools/Utilities, High Availability, Replication, 9i Enhancements, Security, Architecture, Backup and Recovery, Tuning, and Partitioning.

9i Enhancements

- External Tables
- LogMiner
- Multiple Block Sizes
- Oracle Managed Files (OMF)
- Resumable Space Allocation

Administration

- Installation and Configuration
- Space Management
- Troubleshooting
- Upgrade

Architecture

- Components
- Memory Structure
- Optimal Flexible Architecture (OFA)
- Physical and Logical Structures
- Undo and Redo
- UNDO Tablespaces

Backup and Recovery

- Backup Scenarios
- Methods
- Restore Scenarios
- RMAN

High Availability

- Cluster Guard
- Data Guard
- Real Application Clusters (RAC)

Managing Objects

- Constraints
- Data Dictionary
- Datatypes
- Materialized Views
- Redefining Tables

Networking

- Configuration
- Database Links
- Failover
- Oracle Internet Directory

Partitioning

- Indexes
- Reconfiguring
- Tables

Replication

- Advanced
- Cache Fusion Architecture
- Object Replication

Security

- Fine Grain Auditing
- Password Management
- Privileged Connections
- Views
- Virtual Private Database (VPD)

Tools/Utilities

- Import/Export
- Oracle Enterprise Manager (OEM)
- SQL*Loader
- Transportable Tablespaces

Tuning

- Diagnostics
- Indexes
- Optimizer
- SQL Statement Tuning
